

CLINICAL TRIAL

VOLUNTEERS NEEDED!

Auckland-based biotechnology company, Pictor Limited is commencing a clinical trial to test COVID-19 antibodies in Aotearoa / New Zealand.

Who is eligible to participate?

- Adults vaccinated with at least 3 doses of a COVID-19 vaccine
 - Aged between 18 and 64 years old
 - Based in Auckland / Tāmaki Makaurau
- and** not had a previous COVID-19 infection (Group 1)
or had at least one COVID-19 infection since 1 March 2022 (Group 2)

What is involved?

All participants will have a general health check-in with our clinical trial nurses and then donate a small blood sample for antibody testing.

For Group 1 (vaccinated but no COVID-19 infection) the participants will need to repeat this check-in three times in a 6 month period

What will the study do?

- All participants can find out if they have detectable antibodies against the COVID-19 virus.
- The study results will help evaluate potential risks of transmission and/or future infections, to protect New Zealanders

I'm interested!

How do I participate or find out more?
